PROFESSIONAL SUMMARY

Aspiring game designer who loves both playing and making games, with inspiration drawn from anime, manga, and the games I play. Built 6 original projects across Unity, Unreal Engine, Godot, Twine, and Quest, spanning stealth, narrative, platformer, runner, shooter, and puzzle genres. I enjoy the full process from first concept to playtesting, keep a running list of game ideas, and finish what I start. Pursuing dual B.S. degrees in Game Software Development and Computer Science.

PROJECTS

Game Prototypes (6 projects)

Designer and Developer

- **Slime Research** (Unity, Blender): Solo-built an educational 20-level game combining Sokoban-style block puzzles with trivia; created all 3D art in Blender, programmed the gameplay, and used generative AI to draft trivia dialogue.
- **Zombie Panic** (Unreal Engine): Solo-developed a first-person arena shooter as a course project, with ammo pickups, reloading, and escalating enemy waves.
- **Dragon Flight** (Unity): Extended a course project into a complete 3D endless runner; designed difficulty scaling, wave system with countdown timers, and refined core gameplay loop for replayability.
- **Escape the Reboot Protocol** (Godot): Solo-developed a stealth 2D platformer; designed player movement, enemy detection logic, and collectible systems; created all pixel art assets in Pixelorama.
- **Rolling on Time** (Quest): Designed all math puzzles across three difficulty levels and restructured story flow for a narrative adventure; created all visual assets in Inkscape.
- **Ninja in Training** (Twine): Led concept and design for a puzzle-based stealth interactive story; wrote the game design document, designed all character art in Inkscape (with light edits to sourced backgrounds), and directed narrative structure and player-choice branching.

SKILLS

Languages: C#, C++, Java, Python, HTML, CSS

Design and Engines: Unity, Unreal Engine, Godot, Twine, Quest, Blender, Pixelorama, Inkscape

Design Skills: Gameplay Systems, Narrative Design, Level Design, Puzzle Design, Playtesting, Game Design Documentation

Professional: Problem-Solving, Attention to Detail, Team Collaboration, Time Management

EXPERIENCE

Intern

02/2022 – 04/2022

Designpropaganda

- Evaluated visual content for quality and consistency across creative projects, assessing UI, art direction, and presentation standards.
- Organized and maintained digital asset libraries, supporting structured documentation and asset pipeline workflows.
- Collaborated cross-functionally with creative teams on design projects.

Rater

09/2021 – 12/2021

Telus International

- Evaluated digital content against structured quality criteria, producing detailed, actionable feedback reports.
- Identified inconsistencies in user-facing content, developing a rigorous eye for quality and user-experience issues.

Karate Instructor

08/2013 – 12/2017

Choe's Hapkido

- Designed and delivered structured training programs, scaffolding progressively challenging curricula for students at varying skill levels.
- Built positive learning experiences through clear communication and iterative feedback.

EDUCATION

Baker College

Bachelor of Science, Game Software Development.

05/2027

Baker College

Bachelor of Science, Computer Science.

05/2027

Georgia Southern University

Bachelor of Arts, International Studies.

05/2021
